Response to Amendment

The reply filed on 27 June 2007 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): the newly submitted claims are directed to an invention that is independent or distinct from the originally claimed invention, all of the remaining claims are withdrawn from consideration because they do not encompass the scope of the originally presented/examined claims. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Election/Restrictions

Newly submitted claims 35-52 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 6, 9, 11-13, 21-32, drawn to a seed-support medium, classified in class 47, subclass 59S.
- II. Claims 35-50, drawn to an aeroponic and hydroponic growing system, classified in class 47, subclass 62R.
- III. Claims 51-52, drawn to a modular seed cartridge, classified in class 47, subclass 73.

Art Unit: 3643

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the rigid cup to be porous and that the hydrophilic cellular substrate be dry, seed embedded polymer. The subcombination has separate utility such as it can be planted in a farm field or in a conventional flower pot.

Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require that the medium be storable without germination of the seed and that the substrate be a pre-polymer seed embedded cellular polymer. The subcombination has separate utility such as it can be planted in a farm field or in a conventional flower pot.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in

Art Unit: 3643

accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 35-52 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03. No claims remain in the application.
